

ROBUST PROTECTIVE COVER
for Control Valves and Damper Actuators

DESCRIPTION

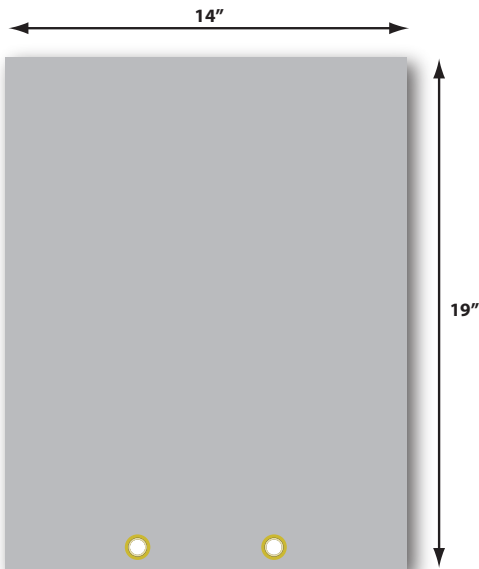

If you have difficult operating conditions then this is the ideal solution for protecting your control valves in harsh environments.

The AM3F Series cover offers an innovative and effective weather protection solution for control valves and actuators. Made of heavy-duty fabric it gives significant protection against severe weather such as rain, sleet or snow. The "Boulder Grey" colour minimizes solar glare which keeps the equipment cooler than other forms of protection. It can be installed and removed in seconds and fits Spartan's popular control valve assemblies.

FEATURES

- Easy installation
- Long lasting nylon ropes included
- Boulder Grey colour to minimize solar glare
- Water repellent fabric
- Keeps actuator cool in hot conditions
- Keeps actuator clean and protected
- UV Protective Coating

DIMENSIONS

SPECIFICATIONS

PHYSICAL PROPERTIES Tested in accordance with BS9474		
Base Fabric	550 Decitex Woven Polyester 77gsm	
Coating	Laminate of Flexible PVC on each side of the fabric	
Total Mass	580gsm (+/-30)	
Tensile Strength	Part 4 Method 6	Warp 1000 N50mm
Coating Adhesion	Part 7 Method 9B	30N/50mm
Cold Crack	Part 8 Method 10A	Not higher than -25°C
Flex Resistance	Part 9 Method 11B	500,000 flexes minimum to meet the requirements of ISO 7854 1984 (Method E)
Fusion	Part 22 Method 25A	N/A
Water Penetration	Part 28 Method 29C	Minimum 1500mm
Flammability		Complies with BS6857 Part 2 Type when tested by BS5438 Test 2
Chemical Resistance		Generally satisfactory
SPECIAL FEATURES Flame Retardent, Soft and Flexible, Tough, Mildew Proof, Waterproof		

PART NUMBERS

AM4F-L	Large Cover for V411 & V431 series valves
